OUR COMPANY

At PACE Valves, our overarching philosophy remains centered on the principles of profitability, growth, and the provision of high-quality, fit-for-purpose products.

We are dedicated to delivering consistent and reliable service, fostering mutually beneficial relationships with our customers, the company itself, and our suppliers. This philosophy has been ingrained in our operations throughout the history of our organization, establishing a track record within the South African and Global valve-user industry that is unparalleled.

In pursuit of our philosophy, we approach every customer contact with a set of objectives that drive our actions:

1. **Correct Interpretation of Customer Requirements:** We prioritize a comprehensive understanding of our customers' needs, encompassing both the technical aspects and commercial considerations. By truly grasping the unique demands of each customer, we ensure our solutions align with their specific requirements, contributing to their success.
2. **Identification of the Most Appropriate Source of Supply:** We recognize the significance of selecting the optimal source of supply for our customers. Considering factors such as specification, price, and availability, we diligently evaluate various options to determine the most suitable fit. This approach guarantees that our customers receive products that meet their standards and deliver value for their investment.
3. **Commitment to Customer Satisfaction, After-Sales Service, and Support:** At PACE Valves, our dedication extends beyond the initial sale. We value long-term partnerships with our customers and are committed to their ongoing satisfaction. We provide comprehensive after-sales service and support to address any concerns, resolve issues, and ensure that our customers continue to benefit from our products and expertise.

Through these objectives, we strive to continuously enhance our customer relationships, exceed expectations, and maintain the trust that has been placed in us. Our philosophy is rooted in the understanding that our success is intertwined with the success of our customers, and we embrace the responsibility of supporting them at every stage of their journey.

By upholding this updated philosophy, PACE Valves remains at the forefront of the South African valve-user industry, driving innovation, reliability, and customer satisfaction.

MEET OUR MANAGING DIRECTOR

CHARLOTTE VAUGHAN
MANAGING DIRECTOR

Welcome to **PACE** Valves!

As the Managing Director, I am proud to present our company profile, showcasing our unwavering commitment to excellence in the valve industry.

With a rich history and an unparalleled track record, PACE Valves has emerged as a trusted provider of high-quality, fit-for-purpose valve solutions.

We prioritize customer satisfaction by accurately interpreting their technical and commercial requirements, ensuring we identify the most appropriate source of supply based on specification, price, and availability.

Our dedication extends beyond the initial sale, as we provide exceptional after-sales service and support, ensuring our customers' ongoing success.

At PACE Valves, we are driven by a passion for precision, reliability, and mutual growth, and we invite you to join us on this journey toward seamless operations and unparalleled efficiency.

C Vaughan

PRODUCT RANGE

PACE Valves is a Project House, able to manufacture and supply a variety of fit-for-purpose valves, actuators, and accessories for any process application or plant requirement.

All our products come in a variety of:

- Materials
- Pressure classes
- End connections
- Manual or Actuated
- And Certified if required.

The above criteria all being suitable to withstand the process-specific environment in which they are to be installed. Our incumbent technical staff will be able to assist with selecting the suitable valve requirements for your unique set of parameters. Please contact us for further information.

PRODUCT RANGE

DIVERTER VALVE

- Valve Sizes: 4", 6" & 8"
- Pressure ratings to suit 20 thru to 250 Bar systems
- 60.0° degree Y pattern design to minimise change of direction and potential wear problems
- Smooth passages for unrestricted flow and low frictional losses
- Valve can be operated at full line or minimum pressure avoiding the need to disconnect pipework and or shut down the system to operate
- Simple sealed electric or manual gear operators

EMERGENCY DUMP VALVE

- Valve Size: 4" to suit both 5", 6", 8" & 10" delivery retic systems.
- Pressure ratings to suit 20 thru to 250 Bar systems
- ZERO Dead Leg between piston face and pipe bore
- Crush breaking action to quickly open a flow path in partially impacted systems
- Pneumatically actuated configurations preferred for safe operation in remote control situations
- Simple mounting into overhead reticulation systems

FLUSH WATER INJECTION VALVE

- Valve Body Sizes: 4" thru to 8" Options
- Valve Inlet Port Sizes: 1-1/2", 2" & 3"
- Pressure ratings to suit 20 thru to 250 Bar systems
- Customised body configurations
- Fully automated or manual options

KNIFE GATE

- Valve Sizes: 4", 6", 8" & 10"
- Pressure ratings to suit 20 thru to 150 Bar systems
- Fixed Orifice to Class IV shut-off
- Full bore opening when needed
- Designed for Abrasive, Scaling, Aggressive and Plugging slurries/wastes
- Flow centerline designs to reduce velocity related wear of valve body and downstream pipework
- Integral positioner to guard against damage in service

PRODUCT RANGE

PACE Valves has earned a reputation for delivering top-quality products that exceed the expectations of our valued customers. Whether you are seeking a reliable flow control solution, high-pressure sewer service application, or low-pressure industrial process systems, our diverse range of valves and actuators is designed to meet your specific needs.

VALVES

- Ball Valves
- Bellows
- Butterfly Valves
- Check Valves
- Control Valves
- Diaphragm Valves
- Gate Valves
- Globe Valves
- Knife Gate Valves
- Needle Valves
- Plastic Valves
- Plug Valves
- Pressure Reducing Valves
- Pressure Relief Valves
- Strainers
- And more...

ACTUATORS

- Electric
- Hydraulic
- Pneumatic
- Filter Regulators
- Limit Switch Boxes
- Positioners
- Proximity Sensors
- Solenoids
- And more.....
